Art Unit: 3714

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee. Authorization for this examiner's amendment was given in a telephone interview with David N. Low on May 10, 2007.

The application has been amended as follows:

In the Claims:

Claim 1:

line 9, replace "muscle" with -- physical --

line 15, replace "and or" with --and/or --

Claim 4:

line 1, replace "Said" with -- The --

Claim 5:

line 1, replace "Said" with -- The --

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: Patentability seen in, although not limited to independent claim 1, the combination of elements specifically claimed including the features of graphically simulating qualitative relationships between human diet, exercise, and body weight by passing a pressurized fluid through a conduit to simulate energy flow and to power the device, wherein the energy flow is conducted in series through a variable diet-energy restrictor and a variable exercise-energy restrictor; and further including a diet-energy rate meter, a second fluid rate meter that displays exercise-energy rate, and an energy

Application/Control Number: 10/640,621

Art Unit: 3714

magnitude meter to qualitatively simulate energy magnitude between diet-energy and exercise-energy; and means to display the simulated body weight resulting from changes to the diet-energy rate and exercise energy rate.

The closest prior art of record does not teach or fairly suggest the claimed features in combination. In particular, the prior art of record fails to teach, disclose, or suggest the feature of passing a pressurized fluid through a conduit to simulate energy flow and to power the device. Instead, the prior art utilizes computerized graphics to simulate relationships between diet, exercise and weight.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Cameron Saadat whose telephone number is (571) 272-4443. The examiner can normally be reached on M-F 9:00 - 5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert E. Pezzuto can be reached on (571) 272-6996. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
